A screenshot of a presentation slide titled "Great Indian Hornbill (Buceros bicornis)". The slide is divided into sections: "Current status", "Threats", and "Habitat Zone". To the right of the text is a photograph of two Great Indian Hornbills perched on a branch. The word "Vulnerable" is written in a yellow box above the photo. The slide is part of a video conference, as evidenced by the Zoom interface at the top and bottom.

Great Indian Hornbill (*Buceros bicornis*)

Current status

- It is referred to as 'forest engineers' or 'farmers of the forest' for playing a key role in dispersing seeds of tropical trees, hornbills indicate the prosperity and balance of the forest they build nests in.

Threats

- Loss of habitat
- Hornbills are hunted for their upper beak and feathers for adorning headgear despite being cultural symbols of tribals of Arunachal Pradesh.
- Illegal logging has led to fewer tall trees where the bird's nest.

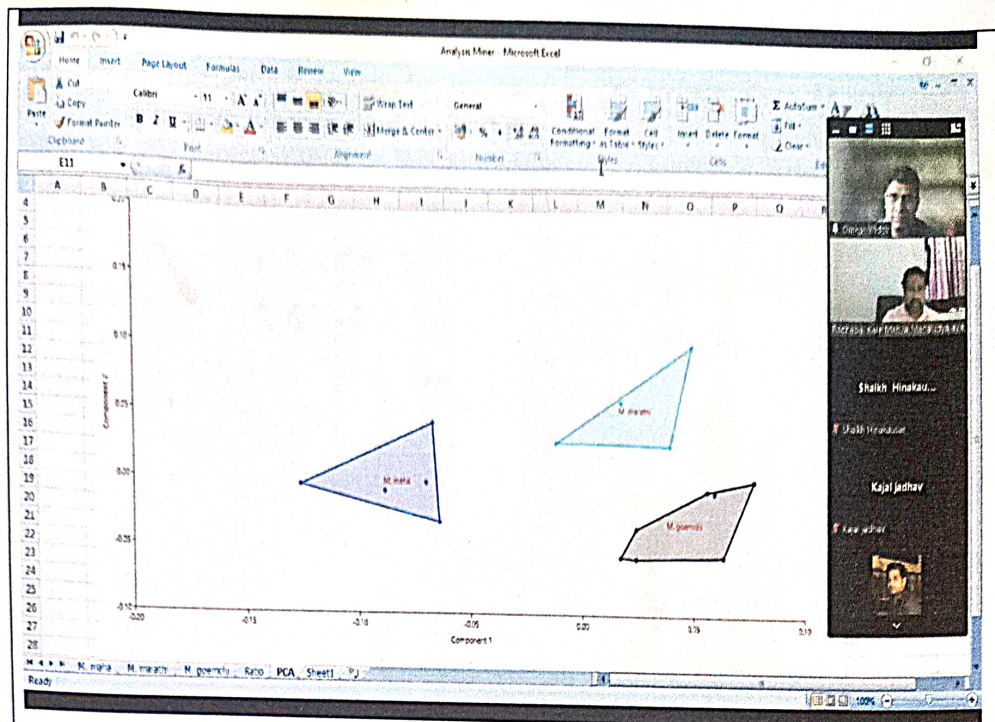

Habitat Zone

forest areas in the Western Ghats and in the forests along the
